

## **SYLLABUS CHEMISTRY OF CRUDE OIL AND PETROLEUM PRODUCTS**

Discipline category: **Advanced knowledge**

Number of hours for study: **210**

Number of credits allocated: **15**

Evaluation form: **Exam**

### **CONTENT**

- 1. General elements related to crude oil and petroleum products: definition, chemical composition, formation assumptions, genesis, extraction of crude oil, petroleum derivatives separated by fractional distillation of crude oil**
- 2. Physico-chemical properties of crude oil and petroleum fractions**
- 3. Methods for characterizing crude oil and petroleum fractions**
- 4. The chemical composition of crude oil and petroleum fractions**
- 5. Classification of crude oils**
- 6. Characteristics of Romanian crude oils**
- 7. Commercial petroleum products: physical-chemical characteristics, standardized values.**
